

NuVue Blueprint Questionnaire

Personalized Strategy Questionnaire | Demonstration Gold Standard

DEMONSTRATION OUTPUT. This sample shows how SimpliCreative can personalize a Blueprint questionnaire using known client context. Prefilled information remains subject to client confirmation, and client-provided claims are not represented as independently verified.

We have already carried forward information you shared in earlier conversations and project materials, so this questionnaire focuses on what still needs to be confirmed, clarified, or decided. Please correct anything that has changed. If a question does not apply, say so rather than forcing an answer.

1. Business Direction

CONFIRM	Our current understanding: NuVue is a B2B sales, leadership, and business acumen training company with 24+ years of experience and 101+ ready-to-train workshops.
Is that still the right high-level description of the business? What would you change before we use it as strategy input?	Confirm, correct, or add context.

Your response / update:

CONFIRM	You previously described a three-year ambition to become a \$10M company known for sales training with guaranteed results, with Agriculture, Manufacturing, and Insurance as priority industries.
Is that still the growth direction? Which part matters most over the next 12–24 months?	We are looking for priority, not a polished vision statement.

Your response / update:

2. Audience and Buying Context

CONFIRM	Primary buyer context currently points to VP Sales / enterprise leaders, with HR/L&D, sales leadership, enablement, owners, and C-suite participants in the buying process.
Who should the new website prioritize first, and who must it still serve well?	Please distinguish primary growth audience from important secondary audiences.

Your response / update:

REQUIRED	Prior inputs reference companies with 100+ sales reps, while other responses describe different thresholds for the guarantee offer.
What company or team characteristics define a strong-fit enterprise client today?	Include sales-team size, company size/revenue if useful, industry, geography, buying maturity, or other qualifiers.

Your response / update:

OPTIONAL	We know several roles can participate in the decision.
What usually changes between the person who first discovers NuVue, the person who evaluates the solution, and the person who approves the investment?	Share any recurring buying-committee patterns you want the strategy to account for.

Your response / update:

3. Guarantee Offer

REQUIRED	Your prior materials contain three related signals: 100+ salespeople as a threshold, 1,000+ reps as an ideal candidate in one response, and a 1,000-rep annual program limit.
Please confirm the guarantee eligibility rules as they should be understood today.	Separate minimum eligibility, ideal client size, annual capacity, application requirements, and any other qualifications.

Your response / update:

REQUIRED	The client-provided offer language states that payment is tied to reps achieving \$100,000+ in sales increase and completing required learning-system activity.
----------	---

What documentation or source should SimpliCreative use to substantiate the guarantee language and any related performance claims before publication?	Examples: agreement terms, ROI Impact Evaluation methodology, program documentation, client-approved case evidence.
---	---

Your response / update:

CONFIRM	The desired website action was previously described as submitting an application and requesting a conversation with a business consultant.
Is that still the correct conversion path for the guarantee offer?	If not, describe the preferred sequence.

Your response / update:

4. Offer Architecture

CONFIRM	Current priorities include the CSP Guarantee, Executive Coaching, Agricultural Sales Onboarding, Public Seminars, sales curricula/subscriptions, and the broader workshop portfolio.
Which three offers or offer families should receive the strongest emphasis over the next year, and why?	Prioritize based on business importance, not simply what exists today.

Your response / update:

REQUIRED	NuVue has both enterprise engagements and transactional / individual offers.
-----------------	--

How should we distinguish acquisition offers, enterprise expansion offers, public/transactional offers, and offers primarily intended for existing clients?	This will help determine navigation, buyer paths, CTAs, and measurement.
--	--

Your response / update:

CONFIRM	You previously described many B2B relationships as multi-year curricula rather than isolated workshops.
What does the typical expansion path look like after a company begins working with NuVue?	If there is no typical path, describe the most common patterns.

Your response / update:

5. Proof, Authority, and Claims

REQUIRED	You have identified testimonials, ROI Impact Evaluations, client relationships, guarantee results, 24+ years of experience, and 101+ workshops as potential proof.
Which proof assets are approved for public use, and where can we find the source material for each?	Please attach or link the strongest available evidence. Client-provided claims will remain attributed to client input until substantiation is available.

Your response / update:

OPTIONAL	NuVue has relationships with organizations such as Wilson Learning and Andromeda Training and has named enterprise clients or business units in prior materials.
-----------------	--

Are there restrictions on how partner relationships, customer names, logos, or results may be described publicly?	Note any approval, trademark, confidentiality, or attribution requirements.
--	---

Your response / update:

6. Buyer Journey and Conversion

REQUIRED	Earlier input said the funnel and conversion definition were still being built.
What website actions should count as meaningful progress for each major buyer journey?	Consider corporate consultation, guarantee application, seminar registration, membership/subscription, assessment, resource engagement, or other actions.

Your response / update:

REQUIRED	Public seminars can serve individuals, company-directed attendees, existing clients, and prospects.
What role should public seminars play in the growth model?	For example: direct revenue, preview experience, new-hire training, corporate lead generation, client expansion, or a combination.

Your response / update:

OPTIONAL	You previously mentioned the possibility of a digital room or richer pre-sales experience.
What information do prospects repeatedly ask for before they are ready to speak with a consultant?	This may inform sales-enablement content and website experiences.

Your response / update:

7. Content and Expertise

CONFIRM	Known content includes short learning videos, webinars, Wilson Learning materials, downloadable resources, testimonials/case evidence, and ROI Impact Evaluations.
Which existing assets are most important to preserve, migrate, or feature in the new experience?	Please link to source files where possible.

Your response / update:

REQUIRED	NuVue's strongest expertise spans Sales Development, Leadership, Business Acumen, and industry-specific experience.
Where does NuVue have proprietary experience, original data, or a point of view that competitors cannot credibly reproduce?	We are looking for source material for differentiated messaging and authority content.

Your response / update:

8. Website Operations and Technology

CONFIRM	Known systems include Google Analytics and Zoho CRM, Bookings, Sign, and Landing Pages. An LMS path was still under consideration.
Which systems are definitely staying, which may change, and which must exchange data with the website?	Include system owner or administrator where useful.

Your response / update:

REQUIRED	Campaign tracking was still developing in the prior questionnaire.
-----------------	--

What source, campaign, lead, lifecycle, and opportunity information is reliably captured today?	If the answer is 'not reliably yet,' that is useful. We will treat it as a measurement requirement rather than assume attribution exists.
--	---

Your response / update:

9. Success and Measurement

CONFIRM	Earlier success language emphasized more SEO/AEO traffic, more forms entering the funnel, and more online transactions.
What business outcomes should leadership ultimately be able to see or understand because of the new website?	We will distinguish business outcomes from directional website metrics.

Your response / update:

REQUIRED	We do not yet have an approved measurement baseline in the known inputs.
Which existing reports or systems can help establish current performance before implementation?	Examples: CRM pipeline reports, revenue by source, form conversion, seminar sales, search performance, or analytics.

Your response / update:

10. Decisions, Constraints, and Source Material

REQUIRED	The strategy will need to reconcile business priorities, buyer paths, proof, offers, technology, and measurement.
-----------------	---

Are there decisions already made that SimpliCreative should treat as fixed rather than reopen during Blueprint?	Examples: platform, partnerships, contractual obligations, offer terms, brand standards, required integrations.
--	---

Your response / update:

OPTIONAL	We have captured the major known inputs above.
What are we still missing that would materially change how we understand NuVue's growth opportunity or website strategy?	Share context, files, concerns, internal disagreement, or a decision you want the Blueprint to help resolve.

Your response / update:

What Happens Next

SimpliCreative will reconcile these responses with the other approved Blueprint inputs, including research, analytics, search data, CRM evidence where available, and prior strategic context. Conflicting inputs will remain visible until they are resolved. Client statements will be preserved as client-provided evidence rather than silently converted into independently verified facts.

The goal is not to collect more information for its own sake. The goal is to reduce strategic uncertainty before recommendations are made.
